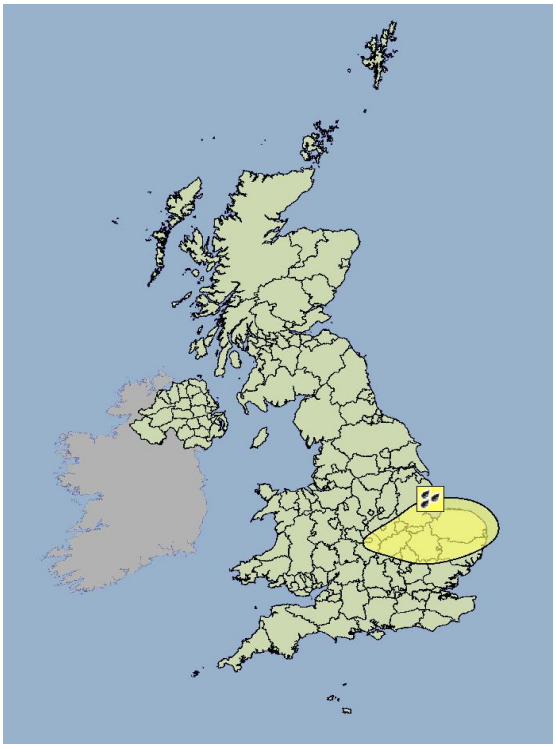
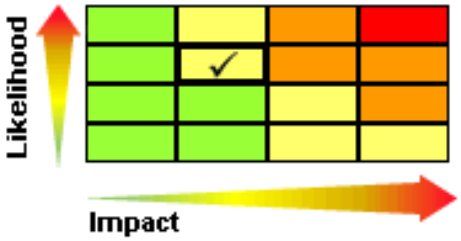
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure will drift slowly eastwards through Saturday, bringing heavy showers and some more organised bands of rain.

30 mm of rain is possible in 2-3 hours in places, with some locations perhaps seeing 40 mm in less than 6 hours. This brings a low risk of surface water flooding, whilst hail, lightning and gusty winds may present additional hazards.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **14:00 on Sat, 01st Oct 2016** until **02:00 on Sun, 02nd Oct 2016**

Showers will become frequent and heavy through this afternoon and into the evening, with thunderstorms also possible. The showers will gradually clear from the west this evening but are likely to continue well into the night over Norfolk.

Please be aware of the risk of localised surface water flooding and difficult driving conditions.
